

Stainless Steel and Brass Wall Railing (Series RU)

Custom stainless steel and brass wall railings save money on installation costs because they're delivered complete and ready to hang. There's no time-consuming cutting or fitting on the job and no lost components. TSM can provide a free estimate if you will provide us with the total footage and the number of individual lengths. For projects with corners, slopes, custom bends, etc., we request a drawing.

CS-1 & R-1 FLANGES

SF-6 FLANGE

Description		Satin Finish	Bright Finish
		Stainless Steel	Stainless Steel
		Model #	Model #
Open Ends Fixed Center Supports	1.9"	RU-200/T-950/SF-6	RU-200/T-950/SF-6/B

TUBING, CUSTOM CUT TO FIT WALL.

- Stainless steel is type 304 (18-8), satin or bright finish available in 1½" and 1.9" O.D. (38&48mm).
- Brass is alloy CDA 250, satin or bright finish available in 1½" and 2" O.D. (38&51mm).

ENDS, FLANGED:

- T-90 - Ends are turned 90° by mandrel bending and heliarc welded to flanges to form a single structural unit.

ENDS, DECORATIVE; RETURNED WITHIN ¼" (6.4mm) OF WALL FACE:

- T-95 - Heavy duty black Butyrate. Press fit into ends.
- T-95SS - Stainless steel cap welded to ends.
- T-95BB - Brass cap welded to ends.
- T-950 - Ends of tubing are left open.

FLANGES WITH 1½" WALL CLEARANCE:

- CS-1: 3" round (76mm), 14 gauge base (2.1mm) with three ¼" (6mm) mounting holes and 20 gauge cover (.9mm), snap-lock concealed screw design.
- SF-6: 4" square (102mm), ¼" thick (6.4mm) with four exposed screw 3/8" diameter mounting holes (9.5mm).
- R-1: 3" round (76mm), 14 gauge (2.1mm) with three ¼" (6mm) mounting holes. *Shown with Model #305U on page 9*

FLANGE WITHOUT 1½" WALL CLEARANCE:

- SF-4: 4" round (102mm), 3/16" thick (5mm) with three ¼" (6mm) mounting holes. *Shown on page 6.*

CENTERS SUPPORTS:

- Fixed (standard) or movable (C-70).
